Professional Summary

Motivated Software Engineer with a strong foundation in Object-Oriented Programming and modern web technologies. Experienced in building scalable, collaborative applications using JavaScript frameworks and backend services. Skilled in writing clean, maintainable code and following software development best practices. Driven to continuously learn emerging technologies and contribute to high-quality application development.

Skills

Programming Languages: Java, C++ , Python, JavaScript.

Web Technologies: React.js, Next.js, Tailwind CSS, Node.js, Express.js, REST APIs, MongoDB, SQL.

Developer Tools: Git, GitHub, Postman, VS Code.

Core Competencies: Object-Oriented Programming, Data Structures and Algorithms, Problem Solving.

Projects

GyaniQuest – AI-Driven Learning Platform

GitHub

- Designed and built an AI-driven web application combining machine learning and API integrations.
- Used Next.js for scalable full-stack development.
- Integrated Gemini API for intelligent, context-aware question flow.
- Project selected and showcased at **Srijan 2025**, a state-level innovation event by RGPV.

Complete Authentication Backend System

GitHub

- Developed a complete backend authentication system with user registration, email verification, and secure login.
- Implemented JWT-based authentication and bcrypt password hashing following industry security practices.
- Integrated MongoDB with Mongoose for user and role-based data management.
- Designed the system to be easily extendable for features such as password recovery and seamless frontend integration.

AI Image Enhancer

Watch Live

- Built a web-based application to enhance images using an AI-powered photo editing API.
- Enabled users to upload images and improve quality, clarity, and resolution with a single click.
- Integrated AI image enhancement services for sharpening, noise reduction, and resolution improvement.
- Designed a fast, responsive, and clean user interface using Tailwind CSS.
- Ensured full responsiveness across mobile and desktop devices with optimized performance.

Education

Bachelor of Technology in Computer Science

Malwa Institute of Technology

Aug 2022 – Jun 2026

CGPA: 7.7

Certifications

- Deloitte Australia Technology Job Simulation on Forage.
- Python : Master Programming and Development, Udemy.
- Foundation of Cloud IoT Edge ML, NPTEL Online Certification, IIT Kanpur.

Extracurricular Activities

Winner of the Shree Jii Innovation Challenge: Think, Build, Innovate.

Team Lead – Srijan 2025 (RGPV)

Led a team in a university-level innovation competition, developing and presenting an AI-driven solution, selected among the top 150 teams out of 1500 participants.
